## Description

MSM is the abbreviation for Methyl Sulfonyl Methan which is an organic form of sulphur, that also occurs naturally and is contained in our daily food intake, even if only in small quantities. The body uses MSM to produce amino acids which in turn are needed for a large variety of bodily functions.

Content:	in 100 g	in 2 gram	% NRV
Methyl Sulfonyl Methan (MSM)	100 g	2000 mg
